SEGMENT FOCUS: CLOUD AUTOMATION

Report VII, June 2010

451 MARKET MONITOR

Market Sizing and Forecasts

ABOUT THIS REPORT

Automation is a critical component of a cloud environment. The ability to automate almost all aspects of infrastructure operation is absolutely necessary to meet many cloud requirements, especially around scaling, elasticity and rapid provisioning. The automation standards for a cloud are an order of magnitude more onerous than even the most advanced enterprise IT infrastructure. Included in our analysis are 36 vendors that we have identified with a stand-alone cloud automation product offering.
